REASONS FOR ALLOWANCE

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

As per independent claim 1, the prior art (and in particular the combination of Schmidt and Ueno) do not teach the refrigerator combination as recited, and in particular a controller controlling the refrigerant flow rate adjuster so that the refrigerant flows to the air heat exchanger at a flow rate not lower than a minimum flow rate which prevents stagnation of the refrigerant in the air heat exchanger in a situation where the refrigerant is made to flow to both the first liquid heat exchanger and the air heat exchanger such that the first liquid heat exchanger and the air heat exchanger operate as condensers.

As per independent claim 8, , the prior art (and in particular the combination of Schmidt and Ueno) do not teach the refrigerator combination as recited, and in particular a controller controlling the refrigerant flow rate adjuster so that the refrigerant flows to the air heat exchanger at a flow rate not lower than a minimum flow rate which prevents stagnation of the refrigerant in the air heat exchanger on basis of a temperature of outside air where the air heat exchanger is placed in a situation where the refrigerant is made to flow to both the first liquid heat exchanger and the air heat exchanger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
